Volume 42 July–December 1980

Philosophical Magazine

First Published in 1798

Physics of Condensed Matter

A Defects and Mechanical Properties

B Electronic, Optical and Magnetic Properties

EUROPHYSICS JOURNAL

Published by
Taylor & Francis Ltd, 4 John Street, London WC1N 2ET

PHILOSOPHICAL MAGAZINE

Editor:

Professor E. A. DAVIS

Associate Editors:

Professor J. E. ENDERBY

Professor A. J. FORTY

Dr. P. M. HAZZLEDINE

E.P.S. Editorial Committee:

Professor J. FRIEDEL (Paris)

Professor A. SEEGER (Stuttgart)

Professor U. VALDRÈ (Bologna)

Consultant Editor:

Professor Sir NEVILL MOTT

Book Review Editor:

Dr. E. MARSEGLIA

Subscription Information

USA, Canada and Mexico (air-freight): annual subscription (payable in advance), $320·00; per part $30·00 (surface post paid). Air-freighted to the USA and mailed from Jamaica, New York, by Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003. Second class postage paid at Jamaica, New York. US subscribers should send order and cheque (in favour of Taylor & Francis Ltd) to Account 04 810 879 Bankers Trust Company, P.O. Box 9137, Church Street Station, New York, N.Y. 10049, USA.

Japan (accelerated surface post): apply to exclusive agents, Kinokuniya Company Ltd., Odakyu West Shinjuku Building, 47–1 Hatsudai 1-chome, Shibuya-ku, Tokyo 151, Japan. Telex 2322535 KINOJL.

Federal Republic of Germany (surface post): annual subscription (payable in advance), DM 506·00; per part DM 48·00 (surface post paid). Subscribers in F.R. Germany should send order and cheque (in favour of Taylor & Francis Ltd) to Account No. 073/6686, Deutsche Bank AG, BLZ 500 700 10, Postfach 2623, Rossmarkt 18, 6000 Frankfurt/Main 1.

UK and the rest of the world (surface post): annual subscription (payable in advance), £115·00; per part £11·00 (surface post paid).

Published monthly by Taylor & Francis Ltd, 4 John Street, London WC1N 2ET, U.K. Telex: 858540.

Printed by Taylor & Francis (Printers) Ltd, Rankine Road, Basingstoke, Hampshire RG24 0PR, U.K.

CONTENTS OF VOL. 42 Nos. 1–6

NUMBER 1—JULY

PART A

PAGE

Extension of the Yoshioka theory of inelastic electron scattering in crystals
By R. SERNEELS, D. HAENTJENS and R. GEVERS 1

On the question of the calculation of migration volumes in ionic crystals
By P. VAROTSOS and K. ALEXOPOULOS 13

On the theoretical strength of copper
By F. MILSTEIN and B. FARBER 19

Observations on the climb of extended dislocations due to irradiation in the HVEM
By C. B. CARTER 31

Anisotropic yielding behaviour of directionally solidified, single-grained eutectics
By K. WAKASHIMA and T. H. COURTNEY 47

Microdeformation in the temperature range of the Bordoni relaxation in aluminium
By C. ESNOUF and G. FANTOZZI 63

Influence de la forme des particules sur la nature des boucles prismatiques primaires dans les alliages à oxydation interne à base de cuivre, déformés plastiquement
Par M. CAHOREAU, M. GROSBRAS, M. F. DENANOT et E. DEDIEU 83

Faulted dipoles in germanium. A high-resolution transmission electron microscopy study
By S.-W. CHIANG, C. B. CARTER and D. L. KOHLSTEDT 103

PART B

Flux pinning by small perturbations in the superconducting order parameter in type-II superconductors
By A. DASGUPTA, D. M. KROEGER, C. C. KOCH and Y. T. CHOU 1

Impurity conduction and minimum metallic conductivity in *n*-type InP subjected to a magnetic field
By G. BISKUPSKI, H. DUBOIS, O. LABORDE and X. ZOTOS 19

Ion polarization and point-defect resistivity in metals
By M. OMINI 31

Spannungsinduzierte Crossover-Effekte in der Nähe des Curiepunkts von Nickel. I. Experimentelles und Meßergebnisse
Von F. SÖFFGE 47

Spannungsinduzierte Crossover-Effekte in der Nähe des Curiepunkts von Nickel. II. Theorie und Diskussion
Von F. Söffge 63

Crystallization of Au_xSi_{1-x} amorphous alloys
By G. Marchal, Ph. Mangin and Chr. Janot 81

A model for the determination of the defect concentrations in III–V compounds. The case of GaSb
By G. Edelin and D. Mathiot 95

Electronic structure of dilute hydrogen in palladium
By M. A. Khan, J. C. Parlebas and C. Demangeat 111

Polarization dependence in the X-ray absorption spectrum of zinc fluoride
By A. D. Cox and J. H. Beaumont 115

The second- and third-order elastic constants of amorphous arsenic
By M. P. Brassington, W. A. Lambson, A. J. Miller, G. A. Saunders and Y. K. Yoğurtçu 127

Analysis of field-effect and capacitance–voltage measurements in amorphous semiconductors
By N. B. Goodman and H. Fritzsche 149

Book reviews 167

NUMBER 2—AUGUST

PART A

Irradiation-induced defects in alkali halide crystals
By C. R. A. Catlow, K. M. Diller and L. W. Hobbs 123

Focused ejection from ion-bombarded gold crystals
By I. Reid, M. W. Thompson and B. W. Farmery 151

Hillock formation in lead films by grain boundary sliding
By M. Ronay and C. F. Aliotta 161

The dislocation core cut-off parameter estimated from stacking-fault nodes in a Cu–Al alloy
By H. Saka 185

Observation par topographie aux rayons X des configurations de dislocations développées à l'extrémité d'une fissure dans le silicium
Par G. Michot, K. Badawi, A. R. Abd el Halim et A. George 195

Strain age hardening in Fe–1 at.%Mn alloy
By T. H. Youssef and G. Saad 217

Coincidence-site-lattice relations for MgO–CdO interfaces
By H. Mykura, P. S. Bansal and M. H. Lewis 225

PAGE

The development of a general three-dimensional surface under ion bombardment
By R. SMITH and J. M. WALLS 235

Laser-induced damage in zinc selenide at a ZnSe/water interface
By G. P. DAVIDSON and D. C. EMMONY 249

Electron diffraction studies of carbon stripper foils
By M. PICKERING, N. R. S. TAIT and D. W. L. TOLFREE 257

Correspondence:

Size distribution of MgO smoke particles
By C. F. JONES, R. L. SEGALL, R. ST. C. SMART and P. S. TURNER 267

Irreversible glide and shape changes in the cyclic deformation of b.c.c. crystals
By F. GUIU and M. ANGLADA 271

PART B

The role of the cooperation number in superconducting systems
By D. ROGOVIN and M. SCULLY 171

The theory of anomalous carrier pulse propagation in amorphous semiconductors
By P. N. BUTCHER and J. D. CLARK 191

The Hall mobility of carriers hopping in an impurity band
By P. N. BUTCHER and A. A. KUMAR 201

The structure of kinks on the 90° partial in silicon and a 'strained-bond model' for dislocation motion
By R. JONES 213

Galvanomagnetic effects in the solid solution and precipitate phases of AuCo alloys
By C. M. HURD and S. P. MCALISTER 221

Configurational entropy calculation for the Bernal random packing of hard spheres. Application to the crystal-melt interface
By A. BONISSENT, J. L. FINNEY and B. MUTAFTSCHIEV 233

The dipolar correlation factor and permittivity of ice IV and V
By G. P. JOHARI 241

Carrier-generation efficiencies in a-Si:F:H-based photovoltaic devices
By A. MADAN, W. CZUBATYJ, D. ADLER and M. SILVER 257

Refinement of a random network model for vitreous silicon dioxide
By P. H. GASKELL and I. D. TARRANT 265

Unusual behaviour of non-stoichiometric cuprous selenide at the transition to the superionic phase
By Z. VUČIĆ and Z. OGORELEC 287

PAGE

Investigation of non-Ohmic hopping conduction by methods of percolation theory
By H. Böttger and V. V. Bryksin 297

Correspondence:

Application of the rate-equation formulation of the a.c. hopping conductivity in amorphous semiconductors
By M. H. A. Pramanik and D. Islam 311

Extent of CdSe presence at 'formed' Se–Cd contacts
By P. B. Sewell, C. H. Champness, M. El Azab and F. Gennaoui .. 315

Book reviews 319

NUMBER 3—SEPTEMBER

PART A

The influence of transition metal substitutions on the formation, stability and hardness of some Fe- and Ni-based metallic glasses
By I. W. Donald and H. A. Davies 277

A micromorphological study of the dissolution of silver–gold alloys in nitric acid
By A. J. Forty and P. Durkin 295

Synchrotron-radiation plane-wave topography. I. Application to misfit dislocation imaging in III–V heterojunctions
By J. F. Petroff, M. Sauvage, P. Riglet and H. Hashizume 319

Synchrotron-radiation plane-wave topography. II. Comparison between experiments and computer simulations for misfit-dislocation images in III–V heterojunctions
By P. Riglet, M. Sauvage, J. F. Petroff and Y. Epelboin 339

The force on a disclination in a liquid crystal
By J. D. Eshelby 359

The evaluation of diffusion coefficients from concentration profiles in semi-infinite solids
By T. Dosdale and A. P. Morris 369

Precipitation in star sapphire. I. Identification of the precipitate
By D. S. Phillips, A. H. Heuer and T. E. Mitchell 385

Precipitation in star sapphire. II. Elastic accommodation of the precipitate
By D. S. Phillips, A. H. Heuer and T. E. Mitchell 405

Precipitation in star sapphire. III. Chemical effects accompanying precipitation
By D. S. Phillips, T. E. Mitchell and A. H. Heuer 417

PART B
Special Issue
THE VERWEY TRANSITION

PAGE

Editorial 325

Materials with mixed valency that show a Verwey transition
By N. F. MOTT 327

Electron correlation theory of Fe_4O_3
By D. IHLE and B. LORENZ 337

Structure of Fe_3O_4 at low temperatures
By S. IIDA 349

Molecular polarons and valence fluctuations in Fe_3O_4
By Y. YAMADA 377

Partial charge ordering in magnetite
By J. R. CULLEN 387

Specific heat of Fe_3O_4. Role played by octahedral Fe^{2+} ions
By M. O. RIGO and J. KLEINCLAUSS 393

Mössbauer and μSR studies on magnetite
By C. BOEKEMA 409

Mössbauer spectroscopy of magnetite and related compounds
By M. ROSENBERG and H. FRANKE 419

Evidence for Anderson localization of the charge carriers in the high-temperature phase of Fe_3O_4
By T. E. WHALL 423

Investigation of phonon softening in the low-temperature phase of magnetite
By A. A. HIRSCH 427

Thermopower and electrical conductivity of magnetite near the Verwey transition
By V. A. M. BRABERS 429

Optical properties of magnetite Fe_3O_4
By H. BOPPART, A. SCHLEGEL and P. WACHTER 431

Magnetic after-effects in Fe_3O_4 and vacancy-doped magnetite
By H. KRONMÜLLER and F. WALZ 433

The order–disorder transition of Ti^{3+}–Ti^{3+} pairs in Ti_4O_7 and $(Ti_{1-x}V_x)_4O_7$
By C. SCHLENKER and M. MAREZIO 453

Charge ordering in Fe_3O_4, Ti_4O_7 and bipolarons
By B. K. CHAKRAVERTY 473

Model for the impurity-induced stabilization of the intermediate phase in Ti_4O_7
By P. FAZEKAS, R. H. FRIEND and E. A. MARSEGLIA 479

PAGE

The vanadium bronzes $Na_xV_2O_5$-β
By J. DUMAS, C. SCHLENKER and R. BUDER 485

Electrical conductivity and thermopower of $Na_xTa_yW_{1-y}O_3$ bronzes
By J. P. DOUMERC, P. DORDOR, E. MARQUESTAUT, M. POUCHARD and P. HAGENMULLER 487

Some questions on charge ordering in Th_3P_4-type mixed-valence rare-earth compounds
By F. HOLTZBERG 491

Physics of Eu_3S_4 and Sm_3S_4
By P. WACHTER 497

NUMBER 4—OCTOBER

PART A

A multiple scattering transport theory for electron channelling patterns
By J. P. SPENCER and C. J. HUMPHREYS 433

Determination of the Burgers vector of a dislocation by weak-beam imaging in a HVEM
By Y. ISHIDA, H. ISHIDA, K. KOHRA and H. ICHINOSE 453

The radiation-induced order–disorder transformation in Cu_3Au
By R. ZEE and P. WILKES 463

Changes in surface topography during the early stage of cyclic deformation of b.c.c. iron-alloy single crystals
By H. MORI, N. OBA, T. MIYAZAKI and T. KOZAKAI 483

On the mechanisms of point-defect absorption by grain and twin boundaries
By A. H. KING and D. A. SMITH 495

Grain-boundary diffusion of ^{119m}Sn in Pb foils by the nuclear absorption technique
By D. GUPTA and D. R. CAMPBELL 513

A mechanism for the origin of screw dislocation sequences, giant screw dislocations, and polytypism in platelet crystals
By D. KUHLMANN-WILSDORF, D. PANDEY and P. KRISHNA 527

Irradiation creep due to SIPA-induced growth
By C. H. WOO 551

Deformation studies of initially dislocation-free copper crystals. III. *In situ* X-ray topography
By I. M. BUCKLEY-GOLDER and B. K. TANNER 559

PAGE

Effect of cold working on precipitation behaviour in superconducting Ti–Nb alloys
By K. OSAMURA, E. MATSUBARA, T. MIYATANI, Y. MURAKAMI, T. HORIUCHI and Y. MONJU 575

PART B

Compton scattering in hydrogenated amorphous silicon
By U. BONSE, W. SCHÜLKE and G. WOLF 499

Electron scattering by molten aluminium
By A. S. BRAH, L. VIRDHEE and N. H. MARCH 511

Influence of defect phonon modes on hopping conduction. I. Formalism
By G. AHMED and J. A. BLACKMAN 517

Influence of defect phonon modes on hopping conduction. II. Numerical results
By G. AHMED and J. A. BLACKMAN 529

Luminescence in plasma-deposited Si–O alloys
By R. A. STREET and J. C. KNIGHTS 551

Correspondence:

A comment on the electrical resistivity during phase separation in alloys
By P. L. ROSSITER 561

The Debye–Waller effect on the forbidden gap in cuprous halides
By M. A. KHAN 565

Electronic effects of sulphur in nickel. A model for grain boundary embrittlement
By C. L. BRIANT and R. P. MESSMER 569

Electronic states at line defects in silicon
By M. J. KIRTON, S. BRAND and M. JAROS 577

D.c. and infrared a.c. conductivity in dense mercury vapours
By H. UCHTMANN, F. HENSEL and H. OVERHOF 583

The resistivity and thermoelectric power of liquid antimony
By R. J. NEWPORT, S. J. GURMAN and R. A. HOWE 587

Book reviews 593

NUMBER 5—NOVEMBER

PART A

Vacancy and substitutional solute distribution around an edge dislocation in equilibrium and in steady-state glide motion
By R. FUENTES-SAMANIEGO, W. D. NIX and G. M. POUND 591

PAGE

Quenching and recovery experiments on molybdenum
By I. A. SCHWIRTLICH and H. SCHULTZ 601

Quenching experiments on niobium
By I. A. SCHWIRTLICH and H. SCHULTZ 613

Dendritic climb of prismatic dislocation loops
By N. JUNQUA and J. GRILHÉ 621

The deformation of polydiacetylene single crystals
By R. T. READ and R. J. YOUNG 629

Dislocation networks in twisted silicon
By D. GWINNER and G. PACKEISER 645

The formation mechanisms of dislocation networks in twisted silicon
By G. PACKEISER and D. GWINNER 661

Screw dislocations in the smectic C phase of liquid crystals
By M. KLÉMAN and L. LEJČEK 671

Correspondence:

The decoration of evaporated Sb_2Te_3 cleavage faces
By B. LAMPERT and K. REICHELT 683

Elastic force dipole model and elastic energy of cross-links in polyethylene crystals
By F. GUIU and L. G. SHADRAKE 687

PART B

Drift-diffusion contributions to the thermopower and Nernst–Ettingshausen coefficient of graphite
By C. AYACHE and I. L. SPAIN 597

Amorphous subsystems in superionic conductors
By Z. OGORELEC and Z. VUČIĆ 617

***3d* transition metal intercalates of the niobium and tantalum dichalcogenides. III. Optical properties**
By S. S. P. PARKIN and A. R. BEAL 627

Spectral analysis of the fatigue of the photoluminescence and of the creation of paramagnetic centres in amorphous Ge_xSe_{1-x}
By F. MOLLOT, J. CERNOGORA and C. BENOIT À LA GUILLAUME 643

PAGE

Studies of the mechanism of the decomposition of hydrogenated a-Si films
By P. John, I. M. Odeh, M. J. K. Thomas, M. J. Tricker, F. Riddoch and J. I. B. Wilson 671

An experimental and theoretical evaluation of surface states in MgO and other alkaline earth oxides
By E. Garrone, A. Zecchina and F. S. Stone 683

X-ray studies of the charge-density wave transitions in TaS_2
By M. O. Robbins and E. A. Marseglia 705

Book reviews 717

NUMBER 6—DECEMBER

PART A

A quantitative assessment of the capabilities of $2\frac{1}{2}$D microscopy for analysing crystalline solids
By G. M. Michal and R. Sinclair 691

Close-packed structures of spheres of two different sizes. I. Observations on natural opal
By J. V. Sanders 705

Close-packed structures of spheres of two different sizes. II. The packing densities of likely arrangements
By M. J. Murray and J. V. Sanders 721

Thermal properties of vibrating dislocations
By Y. H. Ohashi and K. Ohashi 741

The study of glide dislocation loops on {001} planes in a f.c.c. alloy
By A. Korner and H. P. Karnthaler 753

***In situ* fracture experiments in b.c.c. metals**
By S. Kobayashi and S. M. Ohr 763

Gliding dissociated dislocations in hexagonal CdS
By D. J. H. Cockayne, A. Hons and J. C. H. Spence 773

Self-diffusion in the intermetallic compound CoGa
By N. A. Stolwijk, M. van Gend and H. Bakker 783

Correspondence:

Stress calculations for interfacial extrinsic and intrinsic dislocation arrays in anisotropic two-phase media
By R. Bonnet and M. Dupeux 809

PAGE

Subject index 813

Index of authors (with titles) 821

Book review index 835

PART B

Special Issue

IMPURITY BANDS IN SEMICONDUCTORS

Editorial 723

Metal non-metal transition in phosphorus-doped silicon
By W. SASAKI 725

Magnetic resonance in impurity bands
By D. P. TUNSTALL 735

Electron states in heavily doped semiconductors
By K.-F. BERGGREN and B. E. SERNELIUS 751

Modified Mott–Hubbard–Anderson model. Results of an unrestricted Hartree–Fock pseudocluster calculation
By R. RIKLUND, A. FERREIRA DA SILVA and K. A. CHAO 755

Diagonal and off-diagonal correlation effects in Anderson-localized states
By H. KAMIMURA 763

Effect of electron electron interactions on hopping and on delocalization
By M. POLLAK 781

Calculation of hopping transport coefficients
By P. N. BUTCHER 799

The mobility of a quantum particle moving in a three-dimensional random potential
By W. GÖTZE 825

Non-Ohmic effects of Anderson localization
By E. ABRAHAMS, P. W. ANDERSON and T. V. RAMAKRISHNAN 827

Effect of compensation and correlation on conduction near the metal non-metal transition
By H. FRITZSCHE 835

Metal–insulator transition in doped semiconductors
By N. F. MOTT and J. H. DAVIES 845

PAGE

Clustering in the approach to the metal–insulator transition
By R. N. BHATT and T. M. RICE 859

The dielectric anomaly as the insulator–metal transition is approached from the insulating side
By T. G. CASTNER 873

Far-infra-red investigations of impurity bands in semiconductors
By S. NARITA and M. KOBAYASHI 895

Optical measurements of the approach to the Anderson transition
By G. A. THOMAS, M. CAPIZZI and F. DEROSA 913

The effect of stress and strong magnetic fields on the shallow impurities in semiconductors and the piezoresistance and magnetoresistance for hopping conduction
By J. A. CHROBOCZEK 933

Conductance oscillations in two-dimensional GaAs impurity bands
By M. PEPPER 947

Impurity bands in inversion layers
By A. B. FOWLER and A. HARTSTEIN 949

The study of electron dynamics in *n*-type CdS by spin-flip Raman scattering
By S. GESCHWIND, R. E. WALSTEDT, R. ROMESTAIN, V. NARAYANAMURTI, R. B. KUMMER, R. FEIGENBLATT and G. DEVLIN 961

Metal–insulator transitions in amorphous semiconductors
By K. MORIGAKI 979

Magnetic freeze-out in doped semiconductors. The metal non-metal transition in *n*-type InSb
By J. L. ROBERT, A. RAYMOND, R. L. AULOMBARD and C. BOUSQUET.. 1003

Subject index 1027

Index of authors (with titles) 1035

Book review index 1049
